

Online Accounting

Access client financial data when you need it... anywhere!

An Innovative Solution

Your client businesses need to keep close control of their financial data. They should know where they stand at all times. To advise them, you also need to quickly access their data. When their data is in their office, how do you quickly get the information you need? The simple solution is e-Accounting.

e-Accounting helps businesses of any size keep their financial data and accounting software in a safe, secure environment—our protected data center. It allows access to that data to permitted users regardless of their location or local computing platform, through the Internet. Suddenly, you can review your clients' books in real time from your office, home, or on the road!

e-Accounting empowers you to be your clients' trusted financial advisor. It helps you do ongoing write-up painlessly and train clients to do accurate bookkeeping. You're free to focus on what's more important—giving clients insightful advice that ensures their businesses thrive, and growing your own practice.

How It Can Work for You

Becoming an e-Accountant is easy and affordable. First, get your practice connected to our secure data center one of three ways:

- **Accounting Station:** one instance of QuickBooks Pro for as little as \$1.83 per day
- **Virtual Desktop:** versatile way of running multiple applications such as QB, Peachtree, MS Office, Act!, etc. for as little as \$2.83 per day per user
- **Dedicated Hosting:** dedicated server for 10 QB Pro users for as little as \$1.33 per day per user, or other custom server options

Next, get your clients up on one of these and now you have free access to your files and your clients' books from any computer on the Internet, anytime!

Hassle-Free Computing that Streamlines Your Practice

e-Accounting is the solution to managing, maintaining, and providing access to critical financial data, empowering you to:

- Help clients keep a single set of books regardless of how many locations they have
- Keep everyone on the same version of software
- Use a single application license and still work from any computer
- Work from your office, home, or on the road!
- Access your clients financial data anytime, anyplace, and enable your clients to do the same!
- Easily clean up books and get to the business of financial reporting and other value-added services
- Answer clients' questions and solve problems quickly through easy, instantaneous file access
- Reduce travel time and cost to visit clients' offices
- Consult, mentor, and train clients in accounting applications through our *shadowing* feature
- Focus on your core business and leave IT management concerns to us
- Obtain virus protection and automatic backup of data nightly
- Receive 24/7 technical support

"One April 15th, because of instant access to clients' files through e-Accounting, I answered urgent questions from five clients in 15 minutes. A colleague looked at me dumbfounded that I pulled it off!"

*Floyd Wellons, Preferred Financial Workgroup
Minneapolis, Minnesota*
